

Final solutions: symmetric sensitivity by amplitude

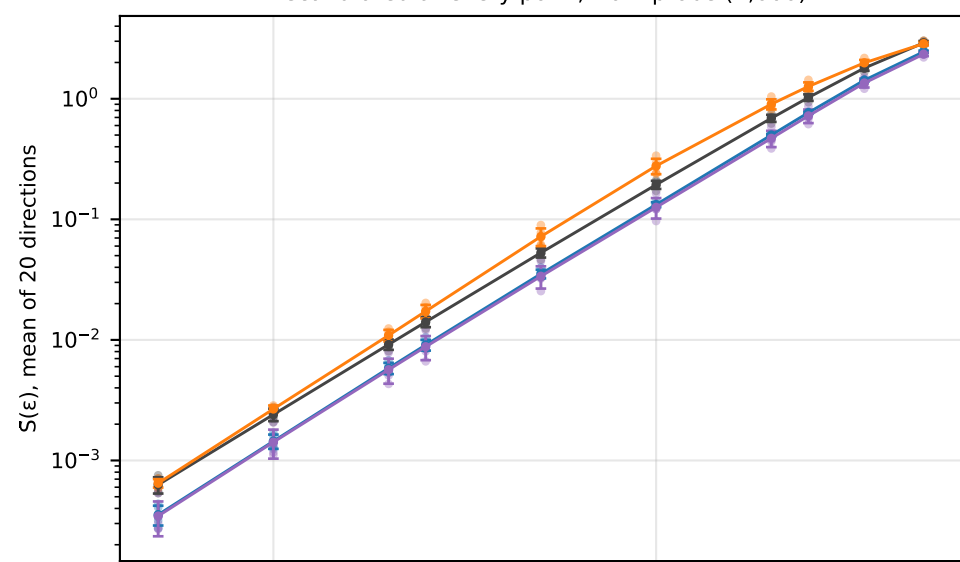

saved/frozen BN, train probe (1,000)

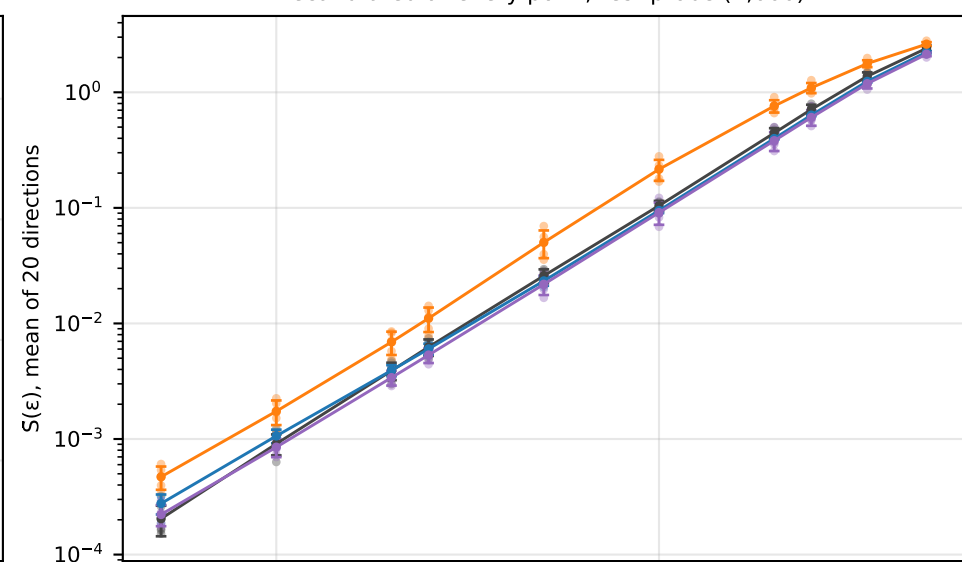

saved/frozen BN, test probe (1,000)

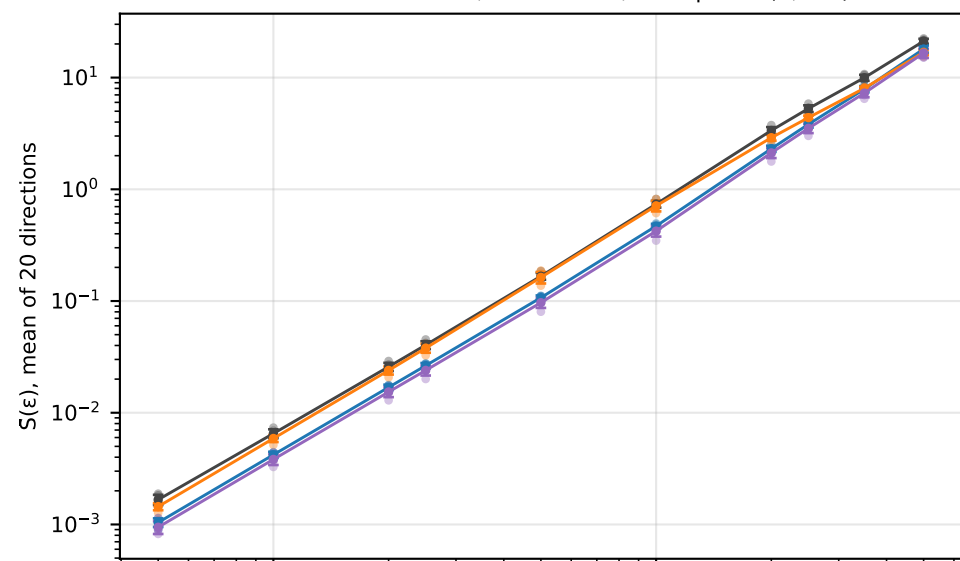

recalibrated at every point, train probe (1,000)

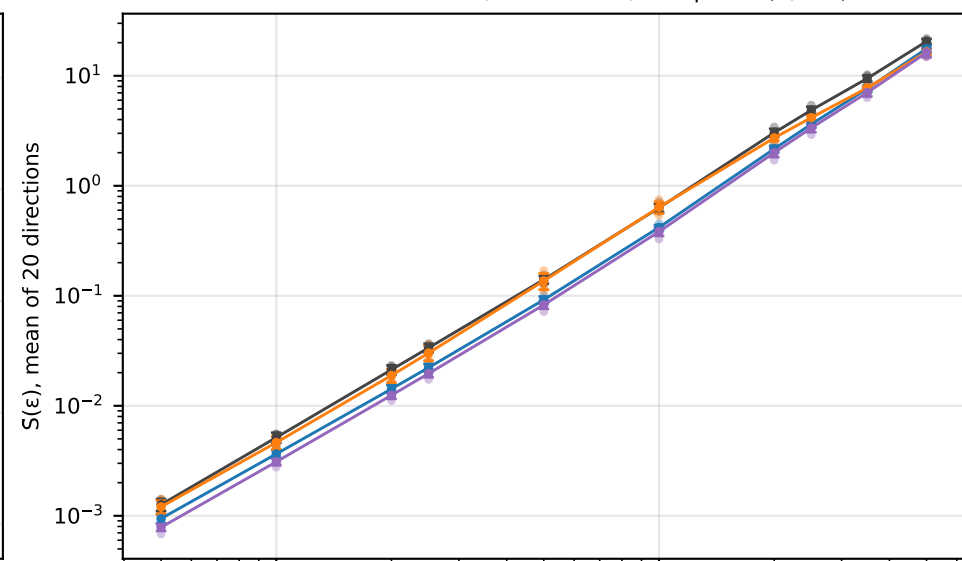

recalibrated at every point, test probe (1,000)

recalibrated at centre, then frozen, train probe (1,000)

recalibrated at centre, then frozen, test probe (1,000)

ϵ (RMS relative block displacement)

ϵ (RMS relative block displacement)
