
Hessian restricted to conv + fc weights at the epoch-30 solutions (dots = seeds, bar = mean; × = unconverged Ritz value)
ordinary H, saved/frozen BN, train probe (1,000)
ordinary H, saved/frozen BN, test probe (1,000)
ordinary H, recalibrated at centre, then frozen, train probe (1,000)
ordinary H, recalibrated at centre, then frozen, test probe (1,000)
relative H, saved/frozen BN, train probe (1,000)
relative H, saved/frozen BN, test probe (1,000)
relative H, recalibrated at centre, then frozen, train probe (1,000)
relative H, recalibrated at centre, then frozen, test probe (1,000)
