

Loss-landscape slice at one set of weights: the same directions, two objectives

1-D cuts through the anchor, each shifted to its own centre

anchor: epoch 12 checkpoint
arch: resnet20_bn_cifar
 $\sigma=0.50$ at every one of the 19 sites
($q_i=1$: this arm is R32)

200 test images, fixed across the grid
grid 5x5, span ± 1.0
directions: filter-normalised, seed 0

centre $L_\sigma = 0.883$
centre $L_0 = 3.809$
