

Loss-landscape slice at one set of weights: the same directions, two objectives

anchor: epoch 12 checkpoint
arch: resnet20_bn_cifar
 $\sigma=0.50$ at every one of the 19 sites
($q_i=1$: this arm is R32)

500 test images, fixed across the grid
grid 21 $\times$ 21, span ± 0.3
directions: filter-normalised, seed 0

centre $L_\sigma=0.867$
centre $L_0=3.714$ ($\times 4.28$)

curvature at the anchor
 L_σ : 38 (α), 71 (β)
 L_0 : 189 (α), 146 (β)
filtered is 5.0 $\times$ / 2.1 $\times$ flatter

slice minimum
 L_σ at (0.00, 0.03)
 L_0 at (0.14, 0.07)
