

Analysis A: final solutions, centre-subtracted CE. Target state ($r=32$, no filter), recalibrated BatchNorm, direction pair 0. Matched relative filter-wise perturbations: the same random draws scaled by each solution's own filter norms, not an identical physical plane. Floors: contours of the same grid.

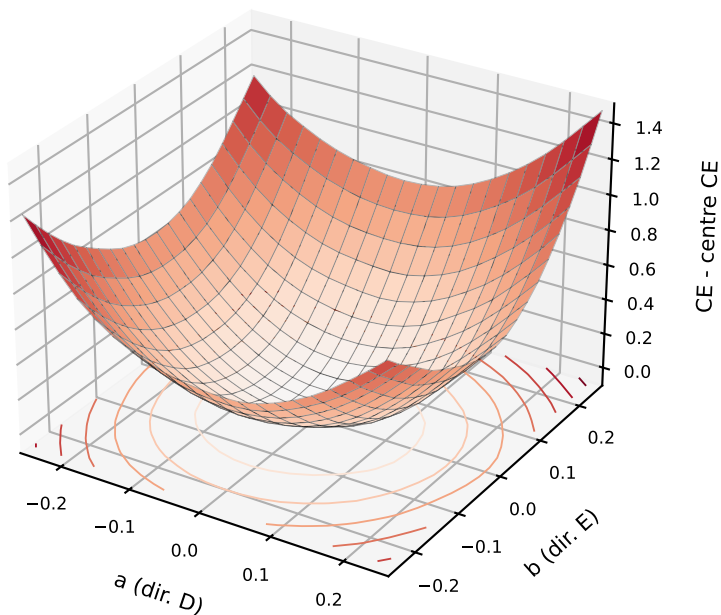

plain, epoch 30, seed 0
train probe (1,000 imgs), centre CE 0.224

resolution-only, epoch 30, seed 0
train probe (1,000 imgs), centre CE 0.305
