

Analysis B. Same weights (resolution-only, seed 0, epoch 6: last update at $r=16$), same centre, directions, subsets and axes; three counterfactual reduction states. Recalibrated BN per state.

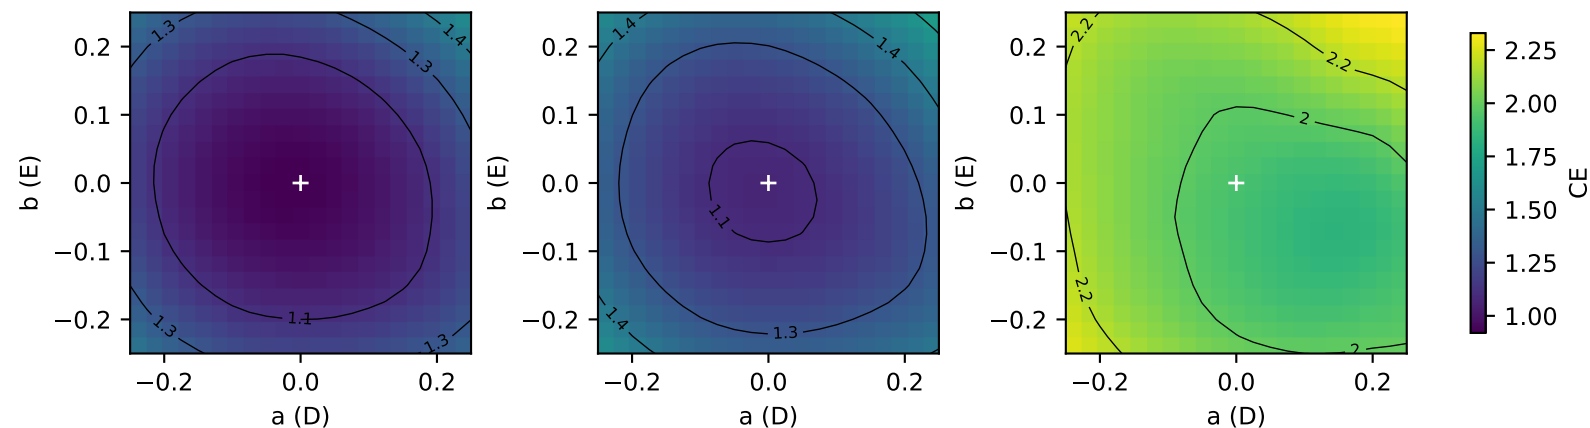

train probe (1,000), evaluated at $r=16$ train probe (1,000), evaluated at $r=24$ train probe (1,000), evaluated at $r=32$
 CE (centre 0.817) CE (centre 1.065) CE (centre 1.847)

train probe (1,000), $r=16$: CE - centre train probe (1,000), $r=24$: CE - centre train probe (1,000), $r=32$: CE - centre
